NINGBO NAVITE HOLDING GROUP CO.,LTD

COMPANY PROFILE

Ningbo Navite Holding Group Co.,Ltd was established in 1983, a leading & professional manufacturer and exporter of spray guns, airless sprayer & pneumatic tools etc in Ningbo China. There are 500 employees, 30 engineers, 80 technicians and 50000m² operation areas. Our capability is 250000pcs per month now.

Navite company start airless sprayer business in 2003, it is one of the leader of manufacturer and exporter for airless sprayer in China. We offer qualified product with competitive price for our customer. We already cooperated with customer in USA, Germany, France, Holland, Australia, Korea, Brazil, India and other 28 countries, we are looking forward to cooperate with you.

Airless Paint Sprayer have high efficiency, smooth and delicate surface, strong adhesion, coating less wear and tear. Which used in construction, machinery, ships, furniture and other industrials used.

Application: the construction of large buildings exterior wall paint, stadiums construction and maintenance, road paint line, bridge maintenance, steel corrosion, wood preservative, railway locomotive maintenance, floor coating, new and refurbished, encaustic tile spray, oil, water and special purpose coatings.

DIY Airless Paint Sprayer

■ NA430

NA430 sprayer gives you the power to complete your painting and staining projects faster and easier than ever before. Spray in any direction even overhead and achieve a professional-grade finish.

Application: residential interior wall and ceiling, Residential exterior walls and garage door and fences and decks.

Material: primers, stains, enamels and interior latex.

■ NA420B

The product is small size, light weight, portable, low noise, spray strong, smooth and uniform coating, easy operation, high efficiency.

Applicable to roof, garage, flooring, fences, furniture manufacturing, such as spraying operations. Can spray the exterior latex paint, oil paint and some protective coatings, spray the surface of modern essential tolls.

Model	Power Source	Max. Delivery	Max. Tip Size	Max. Operating Pressure	Working Pressure	Capacity	Carton Dimension

New, efficient, stable and reliable performance brushless motor with a multi-purpose, high flow characteristics, extremely high safety which is suitable for indoor spraying operations.

Digital pressure display and control devices, which show the working pressure (the maximum working pressure: 228bar/3300psi) and the delivery amount (the maximum: 1.71GPM/6.5LPM). Make sure any coating spray rate stability under pressure, to avoid the finishing thickness uneven color blur and other issues.

Smart pressure control system with simple operation. Auto deliver control for different work. Heavy duty brushless motor offer powerful driver for working. Wide spray material for using. Long working life design, the piston testing approved 100000m².

It is equipped high flow return valve, digital display, heavy duty pump body, big and powerful electronic board and strong stainless steel frame. Rotary suction tube make it easy to disassemble and easy to clean.

It can be connected with two guns at the same time, usually one hour one gun can spray about 600m² (plane), the efficiency is 15-20 times compared to the traditional work. Connect two guns at the same time, the efficiency is higher and the cost is reduced. One machine while using two guns the high efficiency can be imagined.

Application: interior and exterior latex paint, elastic paint, epoxy resin, fire retardant paint, coatings and fillers such as corrosion in high-viscosity paint spraying operations.

Heavy Duty Airless Paint Sprayer

■ NAS50H/L

New, efficient, stable and reliable performance brushless motor with a multi-purpose, high flow characteristics, extremely high safety which is suitable for indoor spraying operations.

Digital pressure display and control device can show the working pressure (the maximum working pressure: 228bar/3300psi) and the delivery amount (the maximum: 0.92GPM/3.50LPM) clearly. Make sure any coating spray rate stability under pressure, to avoid the finishing thickness uneven color blur and other issues. It is equipped high flow return valve, strong stainless steel frame, rotary suction tube which makes the device easy to disassemble, easy to clean.

It can be connected with two guns at the same time, usually one hour one gun can spray about 300m² (plane), the efficiency is 10-15 times compared to the traditional work. Connect two guns at the same time, the efficiency is higher and the cost is reduced. One machine while using two guns the high efficiency can be imagined.

Application:interior and exterior latex paint, elastic paint, epoxy resin, fire retardant paint, coatings and fillers such as corrosion in high-viscosity paint spraying operations.

Industrial Airless Paint Sprayer

The product high quality and excellent performance can be widely used in steel manufacturing, container manufacturing, construction, interior and exterior painting, furniture manufacturing, encaustic tile manufacturing, mechanical vehicle manufacturing industry. For enamel, varnish, inside and outside the wall paint, epoxy paint, steel paint spraying operations.

NA450 is equipped with NA450 Permanent magnet DC motor (1.1HP/820W), 1.8L/min flow rate, and 220bar/3190psi max pressure with NA500B airless spray gun and 517 nozzle. Portable airless sprayer with built-in carrying handle.

■ NA-N1

This machine is applicable to outdoor spraying, Waterproof grouting, Waterproof coating, filling Mortar, Ceiling painting, Wall paint, coating spray, Embossed painting, Art painting, Stone painting, Rock painting, Sculpture painting, Acoustic insulating material spray etc.

Material Spraying Paint, Putty, Thermal mortar, Waterproof material, Fireproof material, Insulation material, Acoustic material, Latex paint, Stone paint, water-based paint and Adhesive coating.

■ NA-N2

This machine used in screw type. It can work on interior and exterior wall coating, cement mortar, waterproof program and fireproof paint spraying etc. Easy operation and maintain design.

■ NA-N3

Fireproof paint, Nature paint, polymer mortar and emulsification mortar

■ NA-N4

Light mortar, putty, waterproof paint, fireproof paint.

Drywall Sander

This machine makes the tedious task of sanding drywall much faster and easier. In easy-to-reach areas, it is much lighter and more convenient. It uses a high efficiency dust collection system and sanding mesh discs for dust-free and clog-free sanding. The ergonomic bail handle and light weight allow sanding in maximum comfort. The routing of the vacuum hose and cable keep them out of your way. The electronic feedback speed stabilization maintains the speed regardless of the load for a perfect sanding finish. It is the perfect complement to our long-reach sander. The long-reach model can be used for all the hard-to-reach areas, and this machine can easily do the rest.
